

EasTec Safety, LLC

A Safety Consulting and Training Company

COURSE OUTLINE

Heavy Equipment Operator for Municipalities

In this short-term training program, students will obtain the skills required to safely operate heavy equipment. Heavy equipment operators (HEO) not only work on regular construction building jobs, but also on CITY/COUNTY infrastructure projects (roads, bridges, and ports, otherwise called non-building construction), and land development. A trained and experienced equipment operator provides necessary skills for any project that requires moving and transporting heavy materials, vacuuming materials, or lifting materials.

Curriculum:

- Core Curriculum
- Orientation to the municipalities
- Heavy Equipment Safety
- Identification of Heavy Equipment
- Basic Operational Techniques
- Basic excavation safety
- Introduction to Earth Moving
- Comprehensive Written Test

Certification Type:

Bucket Truck Operator Safety Certification
Backhoe Operator Safety Certification
Mowers and other Landscaping Equipment
Crane Truck Operator Safety Certification
Fork Lift Operator Safety Certification
Front Loader Operator Safety Certification
Grapple Truck Operator Safety Certification
Skid Steer Operator Safety Certification
Vac-Truck Operator Safety Certification
Grad all
Forklift
Vac-Truck Operator Safety Certification
Grad all
Forklift

Course Length:

7 hours day: per each type of heavy equipment

Instructors: Michael P. Mahoney
